Address:Chaudhari Park,Wakad,**Pune** (411057)

CAREER OBJECTIVE:

PROFESSIONAL SUMMARY

Versatile and accomplished professional with a proven track record of 4+ years of experience in spearheading technical initiatives and ensuring the seamless integration of technology into business processes. Recognized for adept leadership as a Software Development Engineer in Test (SDET). Adept at delivering innovative solutions that enhance software quality, drive efficiency, and exceed performance metrics. Experienced in Web Application Testing, Automation Testing, API Testing, and Web Services Testing, with strong expertise in Selenium WebDriver, Java, Playwright, JavaScript, Manual Testing, and Agile methodologies.

PROFESSIONAL SYNOPSIS:

PROFESSIONAL SYNOPSIS

- Software Test Engineer with 4+ years of experience in Software Testing, proficient in testing web applications using Java with Selenium WebDriver and JavaScript with Playwright. Strong understanding of SDLC, STLC, and Agile Scrum methodologies.
- Hands-on experience in different types of testing, including Sanity Testing, GUI Testing, Functional Testing, Re-testing, Regression Testing, Globalization Testing, Database Testing, and Browser Compatibility Testing.
- Hands-on experience in handling iFrames, mouse hover actions, pop-ups, and list boxes using Action Class and Select Class.
- Experience with Maven as a build management tool for Data-Driven Frameworks.
- Automated functional and regression test scenarios using Selenium WebDriver.
- Experience in creating mock test data for System Testing, UAT, and Regression Testing.
- Hands-on experience in automation framework design and implementation according to project requirements and structure.
- Performed both Manual and Automation Testing activities, including executing, maintaining, and enhancing existing automation test suites.
- Created and maintained libraries and object repositories for automation frameworks.
- Knowledge of Data-Driven Testing, Cross-Browser Testing, and Parallel Test Execution using Selenium WebDriver and TestNG.

- Hands-on experience in end-to-end Functional and Regression Testing, including requirements analysis, test case and test scenario development, test execution, result analysis, and sign-off activities.
- Hands-on experience in Playwright framework setup, configuration, and installation for UI automation.
- Strong expertise in locating web elements and implementing hard and soft assertions for validation.
- Automated functional scenarios involving input fields, radio buttons, checkboxes, dropdowns, multi-select dropdowns, and auto-suggest fields.
- Designed and executed web table automation scripts to validate structured data on the UI.
- Automated workflows involving date pickers and calendar controls.

TECHNICAL SKILLS

- **Programming:** Java, JavaScript, SQL,
- **Automation Tools:** Selenium WebDriver, Playwright, Appium
- **API Testing:** Postman, Swagger, Rest Assured
- **Frameworks:** TestNG, Cucumber BDD, POM, Data-Driven Framework
- **Operating Systems:** Linux, Windows
- **CI/CD & DevOps:** Jenkins, GitHub Actions, Docker
- **Test Management:** Jira, Zephyr, TestRail
- **Source Control:** Git, GitHub, Bitbucket
- **Performance Testing:** JMeter
- **AI Testing:** Generative AI Testing, Prompt Validation, OpenAI API Testing, LLM Validation

WORK EXPERIENCE

Worked as Software Test Engineer with Hexaware Technologies, Pune. June 2022 to Present

PROJECTS

1. **Client** - HSBC (Sept 2024- Currently)

Project -First Direct (digital-first banking)

Domain - Fintech

Roles & Responsibilities -

- Performed exploratory testing and accessibility testing for new and existing features.
- Created BDD scripts in Gherkin for Cucumber feature files to test white-label web applications.
- Identified web elements and maintained automation scripts for web application testing.

- Implemented parallel execution in the automation framework to run multiple test scenarios on remote systems simultaneously.
- Refactored front-end web application test suites as part of shift-left testing.
- Leveraged GitHub Copilot to accelerate framework enhancements, optimize step definitions, and reduce coding effort for repetitive automation tasks.
- Actively participated in sprint ceremonies (planning, backlog refinement, retrospectives, and reviews).
- Collaborated closely with stakeholders to define acceptance criteria and perform bug triage.

2. Client - EY (June 2022- sept2024)

Project - EY Virtual Internal Auditor

Domain - Financial Auditing

Roles & Responsibilities

- Analyzed Business Requirement Documents (BRD) and Functional Requirement Documents (FRD) to prepare detailed test scenarios and test cases.
- Executed Manual Testing including Functional, Regression, Smoke, Sanity, Integration, and UAT testing.
- Logged, tracked, and verified software defects using Jira throughout the Defect Life Cycle.
- Performed SQL queries for database validation and backend data verification.
- Developed and maintained automation scripts using **C#, Selenium WebDriver, and Playwright**.
- Improved the Smoke Pipeline pass percentage from 40 percent from to 95 percent
- Automated more than 100 test cases from the backlog.

EDUCATIONAL DETAILS:

Bachelor of Computer (BCA)-2021 Amravati University

Master of Computer Application (MCA) - 2024 Pune University
